

White Construction, Inc.: Building the Future of Renewable Energy & Fossil Fuels

Our Company

Starting in the 1960s with a dream, a lot of determination, and a strong track record, White Construction was founded by Herman White, the son of Helen White, who was the first woman to own a construction company. With the addition of a working partner that was joined together from two separate practices, White Trucking and Excavating, soon began offering full-service services as well as equipment leasing.

Today, WCI provides the following services: heavy highway construction, demolition, asphalt and concrete paving, bridge and site development, underground utility, industrial maintenance, building, signage, remediation, contracting and more services.

Our Goals & Business Philosophy

Our primary goal is to become a leader in renewable energy. WCI is a multi-state company whose philosophy is to "meet the customer's needs" and to "earn to afford to lead." We are committed to the future of our industry and the future of our customers.

We are committed to the highest standards, by hiring the best and brightest professionals, providing safety, and with the utmost respect for the environment.

Our Services

With an increased demand for alternative energy sources, you can count on White Construction, Inc. to design, plan, and build industry-specific projects.

Biofuels & Ethanol

Biofuel facilities are ideally suited for construction in North America as this energy source can be produced from many domestic renewable resources. This market is driven by many factors, including national security, the environment, development of new technology and the production of a country's energy.

Wind Energy

Increasing the usage of wind energy for electricity has the potential to satisfy the world's energy demands, greatly reducing the need for burning fossil fuels. WCI is experienced in designing and constructing wind farms across North America.

Petrochemical Refineries

A market leader in executing capital petrochemical projects in accordance with EPA clean air regulations to reduce fuel emissions, WCI performs on time, within budget, and in a safe, quality manner. WCI's strengths are its refinery turnkey services and successful track record of successful construction and execution.

Fossil Fuel Facilities

With coal and natural gas as the current dominant fuels of choice, more resources are needed to process these resources for use of the ever-growing population. WCI has completed many fuel processing plants across North America, which are fueled by a mix of coal, fuel oil, and natural gas.

Wind Energy Biofuels & Petrochemical Construction Services Crane & Heavy Rigging

Crane & Heavy Rigging Services

White Construction, Inc. (WCI) is available to perform crane services throughout the Midwest, and is familiar with the demands of industrial site and refinery work, maintaining a fleet of rough-terrain hydraulic truck, lattice-boom and crawler cranes (Caterpillar, Link-Belt, etc.) for capacity.

Safety is our top priority. WCI provides comprehensive safety training for all employees and subcontractors. We are committed to providing the highest quality of service to our customers.
